CURRICULUM/ STATUTES & REGULATIONS
FOR
5 YEARS DEGREE PROGRAMME
IN
PLASTIC SURGERY
(MS Plastic Surgery)

UNIVERSITY OF HEALTH SCIENCES,
LAHORE
STATUTES

1. Nomenclature Of The Proposed Course
The name of degree programme shall be MS Plastic Surgery. This name is well recognized and established for the last many decades worldwide.

2. Course Title:
MS Plastic Surgery

3. Training Centers
Departments of Plastic Surgery (accredited by UHS) in affiliated institutes of University of Health Sciences Lahore.

4. Duration of Course
The duration of MS Plastic Surgery course shall be five (5) years (first year in Part I, first two years in Part II and next three years in Part III) with structured training in a recognized department under the guidance of an approved supervisor. The course is structured in three parts:

Part I is structured for the 1st calendar year. The candidate shall undertake didactic training in Basic Medical Sciences, Behavioural Sciences and Biostatistics & Research Methodology. At the end of first year the examination shall be held in above mentioned disciplines. The clinical training in fundamental concepts of Surgery shall start from the 1st day of enrollment.

Part II is structured for the 1st and 2nd calendar year. The candidate shall undertake clinical training in fundamental concepts of Surgery. At the end of 2nd year the examination shall be held in fundamental concepts of Surgery. The clinical training in Plastic Surgery shall start from 3rd year onwards in the recognized institutions.

Part III is structured for 3rd, 4th and 5th calendar years in MS Plastic Surgery. It has two components; Clinical and Research. The candidate shall undergo clinical training to achieve educational objectives of MS Plastic Surgery (knowledge & skills) along with rotation in relevant fields. Over the five years
duration of the course, candidate will spend total time equivalent to one calendar year for research during the training. Research can be done as one block in 5th year of training or it can be done in the form of regular periodic rotations over five years as long as total research time is equivalent to one calendar year.

5. Admission Criteria

I. For admission in MS Plastic Surgery course, the candidate shall be required to have:
   - MBBS degree
   - Completed one year House Job
   - One year experience in Plastic Surgery / General surgery /Allied surgical discipline in the given order of preference
   - Registration with PMDC
   - Passed Entry Test conducted by the University & aptitude interview by the Institute concerned
   - Having up to the mark credentials as per UHS rules (no. of attempts in each professional, any gold medals or distinctions, relevant work experience, Rural/ Army services, research experience in a recognized institution, any research article published in a National or International Journal) may also be considered on case to case basis.

II. Exemptions: A candidate holding FCPS/MRCS/Diplomate/equivalent qualification in General Surgery shall be exempted from Part-I & Part-II Examinations and shall be directly admitted to Part-III Examinations, subject to fulfillment of requirements for the examination.

6. Registration And Enrollment

- Total number of students enrolled for the course must not exceed 2 per supervisor/year.
- The maximum number of trainees that can be attached with a supervisor at a given point of time (inclusive of trainees in all years/phases of MS training), must not exceed 6.
• Beds to trainee ratio at the approved teaching site shall be at least 5 beds per trainee.
• The University will approve supervisors for MS courses.
• Candidates selected for the courses after their enrollment at the relevant institutions shall be registered with UHS as per prescribed Registration Regulation.

7. Accreditation Related Issues Of The Institution

1. Faculty
Properly qualified teaching staff in accordance with the requirements of Pakistan Medical and Dental Council (PMDC)

2. Adequate Space
Including class-rooms (with audiovisual aids), demonstration rooms, computer lab etc.

3. Library
Departmental library should have latest editions of recommended books, reference books and latest journals (National and International).

- Accreditation of Plastic Surgery training program can be suspended on temporary or permanent basis by the University, if the program does not comply with requirements for residents training as laid out in this curriculum.
- Program should be presented to the University along with a plan for implementation of curriculum for training of residents.
- Programs should have documentation of residents training activities and evaluation on monthly basis.
- To ensure a uniform and standardized quality of training and availability of the training facilities, the University reserves the right to make surprise visits of the training program for monitoring purposes and may take appropriate action if deemed necessary.
AIMS AND OBJECTIVES OF THE COURSE

AIM

The aim of five years MS programme in Plastic Surgery is to train residents to acquire the competency of a specialist in the field so that they can become good teachers, researchers and clinicians in their specialty after completion of their training.

GENERAL OBJECTIVES

MS Plastic Surgery training should enable a student to:

1. Access and apply relevant knowledge to clinical practice:
   - Maintain currency of knowledge
   - Apply scientific knowledge in practice
   - Appropriate to patient need and context
   - Critically evaluate new technology

2. Safely and effectively performs appropriate surgical procedures:
   - Consistently demonstrate sound surgical skills
   - Demonstrate procedural knowledge and technical skill at a level appropriate to the level of training
   - Demonstrate manual dexterity required to carry out procedures
   - Adapt their skills in the context of each patient and procedure
   - Maintain and acquire new skills
   - Approach and carries out procedures with due attention to safety of patient, self and others
   - Critically analyze their own clinical performance for continuous improvement

3. Design and implement effective management plans:
   - Recognize the clinical features, accurately diagnose and manage reconstructive problems
   - Formulate a well-reasoned provisional diagnosis and management plan based on a thorough history and examination
   - Formulate a differential diagnosis based on investigative findings
- Manage patients in ways that demonstrate sensitivity to their physical, social, cultural and psychological needs
- Recognize disorders amenable to plastic surgical treatment
- Effectively manage the care of patients with trauma including multiple system trauma
- Effectively recognize and manage complications
- Accurately identify the benefits, risks and mechanisms of action of current and evolving treatment modalities
- Indicate alternatives in the process of interpreting investigations and in decision-making
- Manage complexity and uncertainty
- Consider all issues relevant to the patient
- Identify risk
- Assess and implement a risk management plan
- Critically evaluate and integrate new technologies and techniques.

4. Organize diagnostic testing, imaging and consultation as needed:
   - Select medically appropriate investigative tools and monitoring techniques in a cost-effective and useful manner
   - Appraise and interpret appropriate diagnostic imaging and investigations according to patients' needs
   - Critically evaluates the advantages and disadvantages of different investigative modalities

5. Communicate effectively:
   - Communicate appropriate information to patients (and their family) about procedures, potentialities and risks associated with surgery in ways that encourage their participation in informed decision making
   - Communicate with the patient (and their family) the treatment options including benefits and risks of each
   - Communicate with and co-ordinate health management teams to achieve an optimal surgical environment
   - Initiate the resolution of misunderstandings or disputes
• Modify communication to accommodate cultural and linguistic sensitivities of the patient

6. Recognize the value of knowledge and research and its application to clinical practice:
   • Assume responsibility for self-directed learning
   • Critically appraise new trends in Plastic Surgery
   • Facilitate the learning of others.

7. Appreciate ethical issues associated with Plastic Surgery:
   • Consistently apply ethical principles
   • Identify ethical expectations that impact on medico-legal issues
   • Recognize the current legal aspects of informed consent and confidentiality
   • Be accountable for the management of their patients.

8. Professionalism by:
   • Employing a critically reflective approach to Plastic Surgery
   • Adhering with current regulations concerning workplace harassment
   • Regularly carrying out self and peer reviewed audit
   • Acknowledging and have insight into their own limitations
   • Acknowledging and learning from mistakes

9. Work in collaboration with members of an interdisciplinary team where appropriate:
   • Collaborate with other professionals in the selection and use of various types of treatments assessing and weighing the indications and contraindications associated with each type
   • Develop a care plan for a patient in collaboration with members of an interdisciplinary team
   • Employ a consultative approach with colleagues and other professionals
   • Recognize the need to refer patients to other professionals.

10. Management and Leadership
    • Effective use of resources to balance patient care and system resources
    • Identify and differentiate between system resources and patient needs
- Prioritize needs and demands dealing with limited system resources.
- Manage and lead clinical teams
- Recognize the importance of different types of expertise which contribute to the effective functioning of clinical team.
- Maintain clinically relevant and accurate contemporaneous records

11. Health advocacy:
- Promote health maintenance of patients
- Advocate for appropriate health resource allocation
- Promote health maintenance of colleagues and self scholar and teacher
SPECIFIC LEARNING OUTCOMES

On completion of the training programme, Plastic Surgery trainees including those pursuing an academic pathway will be expected to have demonstrated competence in all aspects of the published syllabus. The specific training component would be targeted for establishing clearly defined standards of knowledge and skills required to practice Plastic Surgery at secondary and tertiary care level with proficiency in the Basic and applied clinical sciences, Basic surgical care, intensive care, and complementary surgical disciplines.

Medical Knowledge - Goals

1. Understand the types of medical and surgical problems addressed on the plastic surgery service during your specific rotation. These problems could include:
   • Congenital defects of the head and neck, including clefts of the lip and palate, and craniofacial surgery
   • Neoplasms of the head and neck, including the oropharynx, and endoscopy
   • Craniomaxillofacial trauma, including fractures
   • Aesthetic (cosmetic) surgery of the head and neck, trunk, and extremities
   • Plastic surgery of the breast
   • Surgery of the hand/upper extremities
   • Plastic surgery of the lower extremities
   • Plastic surgery of congenital and acquired defects of the trunk and genitalia
   • Burn management, acute and reconstructive
   • Microsurgical techniques applicable to plastic surgery
   • Reconstruction by tissue transfer, including flaps and grafts
   • Surgery of benign and malignant lesions of the skin and soft tissues
2. Understand conditions that will complicate surgery.
3. Understand the appropriate techniques of tissue handling and skin closure.

Medical Knowledge - Objectives

1. Demonstrate comprehension of pertinent medical issues through presentation of patients to team on morning rounds.
2. Describe symptoms of healthy flaps and replants
3. Describe symptoms of unhealthy flaps and replants
4. Identify medications which may interfere with blood clotting
5. Identify alternatives to blood clotting medications
6. Name laboratory tests useful in the evaluation and management of blood clotting
7. Demonstrate proficiency in appropriate skin closure techniques in operating room
8. Demonstrate proficiency in appropriate tissue handling techniques in operating room
9. Demonstrate proficiency in appropriate suturing techniques in operating room
10. Name laboratory tests useful in the evaluation and management of wound care
Patient Care - Goals
1. Learn to deliver responsive, timely care for all inpatients.
2. Understand the appropriate post-operative management of free flaps and replants.
3. Understand the appropriate post-operative management of the patient with a changing course.
4. Learn to synthesize all available information in order to make appropriate clinical decisions.

Patient Care - Objectives
1. Demonstrate appropriate tissue handling technique
2. Demonstrate appropriate suturing technique
3. Demonstrate appropriate skin closure technique
4. Demonstrate the ability to make a diagnosis and formulate a surgical plan.
5. Demonstrate the ability to perform suture removal, dressing changes, and wound care.
6. Demonstrate the ability to document all patient encounters with legible chart notes.
7. Demonstrate the ability to accurately check all flaps or replants for any change in color, temperature, capillary refill or bleeding
8. Obtain help from seniors to achieve rapid return to operating room for exploration for any patients who may exhibit change in color, temperature, capillary refill or bleeding of flaps or replants
9. Justify selection of laboratory tests and diagnostic tests for each patient on the service
10. Demonstrate the ability to dictate thorough discharge summaries on all inpatients.

Practice – Based Learning - Goals
1. Develop an attitude of responsibility for the patients on the ward, and in so doing develop the skill of self-assessment with the goal of continuous improvement in practice management style.
2. Understand the importance of critically reading and discussing medical literature pertinent to patients on the service.

Practice – Based Learning - Objectives
1. Critically discuss performance with respect to care of patients and progress made during rotation with Chief of Service or designee at mid-rotation meeting.
2. At least three times during the rotation, choose a pertinent issue pertaining to a patient on the service, critically evaluate an article from the literature which addresses the problem, and present conclusions to the entire team on rounds.

Systems-Based Practice - Goals
1. Understand the importance of supporting medical and ancillary services in the complete and efficient care of the patient.
2. Develop a cost-effective attitude toward patient management.
3. Develop an appreciation for the patients’ interests and convenience in care management plans.
Systems-Based Practice - Objectives
1. Facilitate discharge planning by daily communication with inpatient care manager.
2. Describe indications for medical consultation in the pre- and post-operative periods, particularly with respect to these specialties:
   - Cardiology
   - Gastroenterology
   - Pain Management service
   - Interventional Radiology
   - Hematology
   - Infectious Disease
3. Facilitate daily communication with consulting physicians
4. As pertinent for each individual patient, facilitate daily communication with ancillary services, such as:
   - Physical Therapy
   - Occupational Therapy
   - Speech
   - Enterostomal Therapy
   - Nutrition
   - Mental Health
   - Social Services

Interpersonal and Communication Skills - Goals
1. Develop the ability to respectfully and clearly communicate with other healthcare professionals.
2. Learn to present patients to senior residents, fellows, and attending in an organized and precise manner.
3. Learn how to function effectively as a member of a team.
4. Learn to communicate effectively with patients and their families.

Interpersonal and Communication Skills – Objectives
1. Consistently answer nursing questions and pages clearly and effectively.
2. Present patients on inpatient rounds in an organized and concise manner.
3. Present clinic patients to the attending efficiently to facilitate clinic flow.
4. Gain experience in explaining results of evaluations and recommendations for treatment to patients and their families (practice patient education skills).

Professionalism - Goals
1. Demonstrate respect and compassion for patients and professional staff on the wards, in the clinics, and in the operating room.
2. Develop open-mindedness regarding alternative treatments.
3. Understand need for continual self-assessment and improvement.
4. Develop an attitude of responsibility for patient care requests by senior residents.

Professionalism - Objectives
1. Use appropriate speech and tone of voice when speaking to patients, families, and other healthcare professionals.
2. Allow others the chance to speak, and listen attentively when being spoken to.
3. Demonstrate a conscientious approach to patient care by minimizing delay of care and minimizing passage of incomplete tasks to fellow residents.

**Skills and Procedures**

1. Skin and Soft Tissue Coverage (skin grafts, flaps)
2. Microvascular Reconstruction (Extremity, Breast, Head & Neck etc)
3. Skin Cancers (excisional and reparative surgery involved in treatment)
4. Head and Neck Cancers (tumours of the face, neck and intraoral region)
5. Burns / Sequelae (management of burns and their complications)
6. Hand Surgery and Limb Trauma (management of acute hand injuries, elective and reconstructive surgery, hand rehabilitation, all aspects of amputation)
7. Breast Surgery including Breast Reconstruction
8. Cleft Lip / Palate and Cranio-facial Surgery (including orthodontics, dental and speech therapy)
9. Facial Trauma (soft tissue injuries, maxillofacial traumas including mandibles)
10. Aesthetic Surgery
11. Laser Surgery: Laser License obtained
12. Other congenital Corrections (Ear, Hand, Urogenital etc)
13. Tissue expanders
14. Trunk reconstruction

**Research Experience**

All residents in the categorical program are required to complete an academic outcomes-based research project during their training. This project can consist of original bench top laboratory research, clinical research or a combination of both. The research work shall be compiled in the form of a thesis which is to be submitted for evaluation by each resident before end of the training. The designated Faculty will organize and mentor the residents through the process, as well as journal clubs to teach critical appraisal of the literature.
# REGULATIONS

## 1. Scheme of the Course

A summary of five years course in MS Plastic Surgery is presented as under:

<table>
<thead>
<tr>
<th>Course Structure</th>
<th>Components</th>
<th>Examination</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Part I</strong></td>
<td><strong>Basic Medical Sciences</strong>&lt;br&gt;Anatomy, Physiology, Biochemistry, Pathology, Pharmacology, Behavioural Sciences and Biostatistics &amp; Research Methodology</td>
<td>Part I examination at the end of 1\textsuperscript{st} year of MS Plastic Surgery programme.&lt;br&gt;- <strong>Written:</strong>&lt;br&gt;Paper I: MCQs&lt;br&gt;Paper II: SEQs</td>
</tr>
<tr>
<td><strong>Part-II</strong></td>
<td><strong>Fundamental Concepts in Surgery:</strong>&lt;br&gt;Training in basic clinical techniques of Surgery with compulsory rotation for two years starting from first day of enrollment</td>
<td>Part-II examination at the end of 2\textsuperscript{nd} year of MS Plastic Surgery programme.&lt;br&gt;- <strong>Written:</strong>&lt;br&gt;Papers 1 &amp; 2 : Basic Principles of Surgery&lt;br&gt;- <strong>Oral &amp; Practical/ Clinical Examination</strong>&lt;br&gt;OSCE&lt;br&gt;Clinical Examination (Long case, Short cases&lt;br&gt;- <strong>Log Book</strong></td>
</tr>
<tr>
<td><strong>Part-III</strong></td>
<td><strong>Clinical component of Part III</strong>&lt;br&gt;Training in Plastic Surgery during 3rd, 4\textsuperscript{th} &amp; 5\textsuperscript{th} year of MS Plastic Surgery programme.&lt;br&gt;Three years of training with compulsory &amp; optional rotations in relevant fields</td>
<td>Part III examination in specialized components of Plastic Surgery at the end of 5\textsuperscript{th} year of MS Plastic Surgery programme.&lt;br&gt;- <strong>Written:</strong>&lt;br&gt;Papers 1 &amp; 2: Problem-based questions in the subject&lt;br&gt;- <strong>Oral &amp; Practical/ Clinical Examination</strong>&lt;br&gt;OSCE/&lt;br&gt;Clinical Examination (Long case, Short cases&lt;br&gt;- <strong>Log Book</strong></td>
</tr>
<tr>
<td></td>
<td><strong>Research component of Part III</strong>&lt;br&gt;Research work/Thesis writing project must be completed and thesis be submitted before the end of training.</td>
<td>Part III thesis examination with defense at the end of fifth (5th) year of MS Plastic Surgery programme.</td>

</table>
2. Examinations

Part-I Examination
1. All candidates admitted in MS Plastic Surgery courses shall appear in Part-I examination at the end of first calendar year.
2. The examination shall be held on biannual basis.
3. The candidate who fails to pass the examination in 3 consecutive attempts, availed or un-availed, shall be dropped from the course.
4. The examination shall have two components:
   - Paper-I MCQs (single best) 100 Marks
   - Paper-II SEQS 100 Marks
5. Subjects to be examined shall be Basic Sciences relevant to Plastic Surgery (Anatomy, Physiology, Biochemistry, Pathology, Pharmacology), Behavioural Sciences and Biostatistics & Research Methodology.
6. To be eligible to appear in Part-I examination the candidate must submit;
   - i. duly filled, prescribed Admission Form to the Controller of Examinations duly recommended by the Principal/Head of the Institution in which he/she is enrolled;
   - ii. a certificate by the Principal/Head of the Institution, that the candidate has attended at least 75% of the lectures, seminars, practical/clinical demonstrations;
   - iii. Examination fee as prescribed by the University
7. To be declared successful in Part-I examination the candidate must secure 60% marks in each paper.
Part-II Examination

1. All candidates admitted in MS Plastic Surgery course shall appear in Part-II examination at the end of second calendar year.

2. The examination shall be held on biannual basis.

3. The candidate who fails to pass the examination within 3 years of passing the Part-I examination shall be dropped from the course.

4. The examination shall have the following components:
   a. Written 200 Marks
   b. OSCE 50 Marks
   c. Clinical examination 100 Marks
   d. Log Book Evaluation 80 Marks (40 marks per year)

5. There shall be two written papers of 100 marks each:
   Papers 1 & 2: Principles of General Surgery

6. The type of questions shall be of Short/Modified essay type and MCQs (single best).

7. Oral & practical/clinical examination shall be held in clinical techniques in General Surgery.

8. To be declared successful in Part-II examination the candidate must secure 60% marks in each component and 50% in each sub-component.

9. Only those candidates, who pass in theory papers, will be eligible to appear in the Oral & Practical/clinical Examination.

10. The candidates, who have passed written examination but failed in oral & practical/clinical examination, will re-appear only in oral & practical/clinical examination.

11. The maximum number of attempts to re-appear in oral & practical/clinical Examination alone shall be three, after which the candidate shall have to appear in both written and oral & practical/clinical examinations as a whole.

12. To be eligible to appear in Part-II examination the candidate must submit;
   i. duly filled, prescribed Admission Form to the Controller of Examinations duly recommended by the Principal/Head of the Institution in which he/she is enrolled;
ii. a certificate by the Principal/Head of the Institution, that the candidate has attended at least 75% of the lectures, seminars, practical/clinical demonstrations;

iii. a certificate of having passed the Part-I examination;

iv. Examination fee as prescribed by the University.
**Part-III Examination**

1. All candidates admitted in MS Plastic Surgery course shall appear in Part-III (Clinical) examination at the end of structured training programme (end of 5th calendar year), and having passed the part I & II examinations. However, a candidate holding FCPS / MRCS / Diplomate / equivalent qualification in General Surgery shall be exempted from Part-I & Part-II Examinations and shall be directly admitted to Part-III Examinations, subject to fulfillment of requirements for the examination.

2. The examination shall be held on biannual basis.

3. To be eligible to appear in Part-III examination the candidate must submit:
   i. duly filled, prescribed Admission Form to the Controller of Examinations duly recommended by the Principal/Head of the Institution in which he/she is enrolled;
   ii. a certificate by the Principal/Head of the Institution, that the candidate has attended at least 75% of the lectures, seminars, practical/clinical demonstrations;
   iii. Original Log Book complete in all respect and duly signed by the Supervisor (for Oral & practical/clinical Examination);
   iv. certificates of having passed the Part-I & part-II examinations;
   v. Examination fee as prescribed by the University.

4. The Part-III clinical examination shall have the following components:
   - Written 300 marks
   - Oral & practical/clinical examination 300 marks
   - Log Book Evaluation 120 marks (40 marks per year)

5. There shall be two written papers of 150 marks each.

6. Both papers shall have problem-based Short/Modified essay questions and MCQs.

7. Oral & practical/clinical examination shall have 300 marks for:
   i. 1 Long Case 100
   ii. 4 Short Cases 100 (25 marks each)
iii. OSCE

8. To be declared successful in Part-III examination the candidate must secure 60% marks in each component and 50% in each sub-component.

9. Only those candidates, who pass in theory papers, will be eligible to appear in the Oral & Practical/ Clinical Examination.

10. The candidates, who have passed written examination but failed in Oral & Practical/ Clinical Examination, will re-appear only in Oral & Practical / Clinical examination.

11. The maximum number of attempts to re-appear in oral & practical clinical Examination alone shall be three, after which the candidate shall have to appear in both written and oral & practical/clinical examinations as a whole.

12. The candidate with 80% or above marks shall be deemed to have passed with distinction.

13. Log Book/Assignments: Throughout the length of the course, the performance of the candidate shall be recorded on the Log Book.

14. The Supervisor shall certify every year that the Log Book is being maintained and signed regularly.

15. The Log Book will be developed & approved by the Advanced Studies & Research Board.

16. The evaluation will be maintained by the Supervisor (in consultation with the Co- Supervisor, if appointed).

17. The performance of the candidate shall be evaluated on annual basis, e.g., 40 marks for each year in five years MS Plastic Surgery course. The total marks for Log Book shall be 200. The log book shall reflect the performance of the candidate on following parameters:

   • Year wise record of the competence of skills.
   • Year wise record of the assignments.
   • Year wise record of the evaluation regarding attitude & behaviour
   • Year wise record of journal club / lectures / presentations / clinico-pathologic conferences attended & / or made by the candidate.
3. Submission / Evaluation of Synopsis

1. The candidates shall prepare their synopsis as per guidelines provided by the Advanced Studies & Research Board, available on UHS website.
2. The research topic in clinical subject should have 30% component related to basic sciences and 70% component related to applied clinical sciences. The research topic must consist of a reasonable sample size and sufficient numbers of variables to give training to the candidate to conduct research, to collect & analyze the data.
3. Synopsis of research project shall be submitted by the end of the 3rd year of MS program. The synopsis after review by an Institutional Review Committee shall be submitted to the University for consideration by the Advanced Studies & Research Board, through the Principal / Dean /Head of the institution.

4. Submission of Thesis

1. Thesis shall be submitted by the candidate duly recommended by the Supervisor.
2. The minimum duration between approval of synopsis and submission of thesis shall be one year, but the thesis can not be submitted later than 8 years of enrolment.
3. The research thesis must be compiled and bound in accordance with the Thesis Format Guidelines approved by the University and available on website.
4. The research thesis will be submitted along with the fee prescribed by the University.

5. Part-III Thesis Examination

1. All candidates admitted in MS course shall appear in Part-III thesis examination at the end of 5th year of their training course.
2. Only those candidates shall be eligible for thesis evaluation who have passed Part I, II & III (clinical) Examinations.
3. The examination shall include thesis evaluation with defense.
4. The Vice Chancellor shall appoint three external examiners for thesis evaluation, preferably from other universities and from abroad, out of the panel of examiners approved by the Advanced Studies & Research Board. The examiners shall be appointed from respective specialty. Specialists from General Surgery and Allied surgical Disciplines may also be appointed/co-opted, where deemed necessary.

5. The thesis shall be sent to the external examiners for evaluation, well in time before the date of defense examination and should be approved by all the examiners.

6. After the approval of thesis by the evaluators, the thesis defense examination shall be held within the University on such date as may be notified by the Controller of Examinations. The Controller of Examinations shall make appropriate arrangements for the conduct of thesis defense examination in consultation with the supervisor, who will co-ordinate the defense examination.

7. The thesis defense examination shall be conducted by two External Examiners who shall submit a report on the suitability of the candidate for the award of degree. The supervisor shall act as coordinator.

6. Award of MS Plastic Surgery Degree

After successful completion of the structured courses of MS Plastic Surgery and qualifying Part-I, Part-II and Part-III examinations, the degree with title MS Plastic Surgery shall be awarded.
CONTENT OUTLINE

Part I MS Plastic Surgery

Basic Sciences:
Student is expected to acquire comprehensive knowledge of Anatomy, Physiology, Pathology (Microbiology), Biochemistry, Pharmacology relevant to surgical practice appropriate for Plastic Surgery

1. Anatomy

- Detailed Anatomy of the organ systems of body, their blood supply, nerve supply, lymphatic drainage and important gross relations to other organs as appropriate for surgical operations
- Developmental Anatomy and associated common congenital abnormalities
- Features of Surface, Imaging and Applied Anatomy within each organ system
- Relate knowledge to assessment of clinical situation or progress of disease condition

CARDIOVASCULAR:
- Embryogenesis of heart and major vessels, and formation of the lymphatic system
- Common anatomical variations of heart chambers, valves and major vessels
- Surgical anatomy of heart and major arteries + veins in thorax, neck, abdomen and groins

RESPIRATORY:
- Embryogenesis of trachea and bronchial tree
- Lung development
- Development and defects of diaphragm
- Common anatomical variations of respiratory tree and lungs to include vascular anomalies
- Surgical anatomy of pleura, lung and trachea and bronchial tree

GASTROINTESTINAL TRACT AND ABDOMINAL WALL:
- Embryogenesis of the GIT to include formation of the solid organs, anorectum, and abdominal wall
- Common anatomical variations in the formation of the GIT and abdominal wall
- Surgical anatomy of the GIT and its relations to other systems

RENAL:
- Embryogenesis of the upper and lower renal tract to include male and female genital development
- Common anatomical variations of the renal tract and genitalia
- Surgical anatomy of the renal tract, and associated genital structures to include relationships to other systems
NEUROLOGICAL:
- Embryogenesis of the brain and spinal cord, and of the supporting structures (skull, vertebral column)
- Common anatomical variations of the brain and spinal cord
- Surgical anatomy of the brain, spinal cord and major somatic nerves (to include relationships to other systems)

MUSCULO SKELETAL:
- Embryogenesis of the skeleton and muscle development
- Common anatomical variations of skeleton
- Surgical anatomy of skeleton where relevant to other systems

ENDOCRINE:
Development, defects and surgical anatomy of endocrine organs

2. Physiology

- Cellular organization, structure function correlations and physiological alterations in the organ systems of body
- Relate knowledge to assessment of clinical situation or progress of disease condition

FLUID BALANCE:
- Basic requirements of fluid and electrolytes at different ages
- Mechanisms of homeostasis
- Influence of disease states
  - renal
  - cardiac
  - gastrointestinal
  - trauma
- Mechanisms of homeostasis
- Abnormalities encountered in disease

ACID-BASE BALANCE:
- Basic requirements of fluid and electrolytes at different ages
- Mechanisms of homeostasis
- Influence of disease states

OXYGEN TRANSPORT:
- Airway function in health and disease
- Alveolar function and gas exchange
- Effect of disease
  - R.D.S.
  - Infection
  - Barotrauma
  - Prematurity
- Effect of foetal circulation
GASTROINTESTINAL TRACT:
- Motility of different regions of gut
- Secretion and absorption
- Function of sphincter regions
  - G.O. junction
  - Pylorus
  - Ileocaecal region
  - Anorectum
- Defecation and continence

HEPATOBILIARY FUNCTION AND PANCREATIC FUNCTION:
- Metabolic and synthetic hepatic function
- Bile production and transport
- Exocrine pancreatic function
- Effect of disease on normal function

RENAL TRACT:
- Renal mechanisms for maintenance of homeostasis
- Effect of disease
- Bladder function and continence
- Transitional renal physiology in neonate and young child

GROWTH AND METABOLISM:
- Nutritional requirements at different ages
- Endocrine factors influencing growth
  - thyroid
  - pituitary
  - pancreatic
  - adrenal
  - gonadal
- Effect of disease states including
  - chronic disease
  - trauma
  - response to operation
- Influence and use of parenteral and enteral feeding

AUTONOMIC NERVOUS SYSTEM:
- Differing effects of sympathetic and parasympathetic innervations
- Effects on differing physiological processes

3. Biochemistry

- Membrane biochemistry and signal transduction
- Gene expression and the synthesis of proteins
- Bioenergetics; fuel oxidation and the generation of ATP
- Carbohydrate metabolism
- Lipid metabolism
- Nitrogen metabolism
- Enzymes and biologic catalysis
• Tissue metabolism
• Biotechnology and concepts of molecular biology with special emphasis on use of recombinant DNA techniques in medicine and the molecular biology of cancer

4. Pharmacology

• The Evolution of Medical Drugs
• British Pharmacopia
• Introduction to Pharmacology
• Receptors
• Mechanisms of Drug Action
• Pharmacokinetics
• Pharmacokinetic Process
  o Absorption
  o Distribution
  o Metabolism
  o Desired Plasma Concentration
  o Volume of Distribution
  o Elimination
  o Elimination rate constant and half life
  o Creatinine Clearance
• Drug Effect
  o Beneficial Responses
  o Harmful Responses
  o Allergic Responses
• Drug Dependence, Addiction, Abuse and Tolerance
• Drug Interactions
• Dialysis
• Drug use in pregnancy and in children

5. Pathology

Pathological alterations at cellular and structural level
• Inflammation
• Wound healing
• Cellular injury
• Vascular disorders
• Disorders of growth, differentiation and morphogenesis
• Tumours
• Surgical immunology
• Surgical haematology

Microbiology:
• Surgically important microorganisms
• Sources of infection
• Asepsis and antisepsis
• Sterilization
• Antibiotics  
• High risk patient management

6. Biostatistics & Research Methodology

• Introduction to Bio-Statistics  
• Introduction to Bio- Medical Research  
• Why research is important?  
• What research to do?  
  ▪ Selecting a Field for Research  
  ▪ Drivers for Health Research  
  ▪ Participation in National and International Research  
  ▪ Participation in Pharmaceutical Company Research  
  ▪ Where do research ideas come from  
  ▪ Criteria for a good research topic  
• Ethics in Health Research  
• Writing a Scientific Paper  
• Making a Scientific Presentation  
• Searching the Literature

7. Behavioural Sciences

• Bio-psycho-social (BPS) model of health care  
• Use of non-medicinal interventions in clinical practice  
• Communication skills  
• Counseling  
  ▪ Informational skills  
  ▪ Crisis intervention/disaster management  
  ▪ Conflict resolution  
  ▪ Breaking bad news  
• Medical ethics, professionalism and doctor-patient relationship  
  ▪ Hippocratic oath  
  ▪ Four pillars of medical ethics (autonomy, beneficence, non-malficence and justice)  
  ▪ Informed consent and confidentiality  
  ▪ Ethical dilemmas in a doctor’s life  
• Delivery of culturally relevant care and cultural sensitivity  
  ▪ Psychological aspects of health and disease  
  ▪ Psychological aspect of health  
  ▪ Psychological aspect of disease  
  ▪ Stress and its management  
  ▪ Psychological aspect of pain  
  ▪ Psychological aspect of aging
Part II
MS Plastic Surgery

Fundamental Principles of Surgery

- History of surgery
- Preparing a patient for surgery
- Principles of operative surgery: asepsis, sterilization and antiseptics
- Surgical infections and antibiotics
- Basic principles of anaesthesia and pain management
- Acute life support and critical care:
  - Pathophysiology and management of shock
  - Fluids and electrolyte balance/ acid base metabolism
  - Haemostasis, blood transfusion
- Trauma: assessment of polytrauma, triage, basic and advanced trauma
- Accident and emergency surgery
- Wound healing and wound management
- Nutrition and metabolism
- Principles of burn management
- Principles of surgical oncology
- Principles of laparoscopy and endoscopy
- Organ transplantation
- Informed consent and medicolegal issues
- Molecular biology and genetics
- Operative procedures for common surgical manifestations e.g cysts, sinuses, fistula, abscess, nodules, basic plastic and reconstructive surgery
- Principles of basic diagnostic and interventional radiography
- Principles and interpretation of conventional and advanced radiographic procedures

Common Surgical Skills

Incision of skin and subcutaneous tissue:
- Langer's lines
- Healing mechanism
- Choice of instrument
- Safe practice

Closure of skin and subcutaneous tissue:
- Options for closure
- Suture and needle choice
- Safe practice

Knot tying:
- Choice of material
- Single handed
- Double handed
- Superficial
- Deep
**Tissue retraction:**
- Choice of instruments
- Placement of wound retractors
- Tissue forceps

**Use of drains:**
- Indications
- Types
- Insertion
- Fixation
- Management/removal

**Incision of skin and subcutaneous tissue:**
- Ability to use scalpel, diathermy and scissors

**Closure of skin and subcutaneous tissue:**
- Accurate and tension free apposition of wound edges

**Haemostasis:**
- Control of bleeding vessel (superficial)
- Diathermy
- Suture ligation
- Tie ligation
- Clip application
- Plan investigations
- Clinical decision making
- Case work up and evaluation; risk management

**Pre-operative assessment and management:**
- Plasticiorespiratory physiology
- Diabetes mellitus
- Renal failure
- Pathophysiology of blood loss
- Pathophysiology of sepsis
- Risk factors for surgery
- Principles of day surgery
- Management of comorbidity

**Intraoperative care:**
- Safety in theatre
- Sharps safety
- Diathermy, laser use
- Infection risks
- Radiation use and risks
- Tourniquets
- Principles of local, regional and general anaesthesia

**Post-operative care:**
- Monitoring of postoperative patient
- Postoperative analgesia
- Fluid and electrolyte management
- Detection of impending organ failure
- Initial management of organ failure
- Complications specific to particular operation
- Critical care
Blood products:
- Components of blood
- Alternatives to use of blood products
- Management of the complications of blood product transfusion including children

Antibiotics:
- Common pathogens in surgical patients
- Antibiotic sensitivities
- Antibiotic side-effects
- Principles of prophylaxis and treatment

Safely assess the multiply injured patient:
- History and examination
- Investigation
- Resuscitation and early management
- Referral to appropriate surgical subspecialties

Technical Skills

1. Non trauma Surgery
   - Endoscopy and Laparotomy
   - Drainage of ano-rectal sepsis
   - Urethral catheterisation
   - Suprapubic cystostomy
   - Exploration of scrotum
   - Reduction of paraphimosis
   - Embolectomy
   - Fasciotomy
   - Organ retrieval for transplantation

1. Trauma Surgery
   - Tracheostomy
   - Emergency thoracotomy

2. Surgical sepsis
   - Drainage of superficial abscesses
   - Laparotomy for sepsis
   - Chest drainage for sepsis
   - Thoracotomy for sepsis
   - Burr holes and craniotomy for intracranial abscess

3. Critical care
   - Tracheal Intubation
   - Tracheostomy
   - Surgical airway
   - Cardio-pulmonary resuscitation
   - Chest drain insertion
   - Central venous line insertion
   - Insertion of peritoneal dialysis catheter
   - Primary vascular access for haemodialysis
   - A detailed knowledge of the methods and results of invasive monitoring will not be required
4. **Gastrointestinal surgery**
- Diagnostic upper GI endoscopy
- Oesophageal dilatation
- Oesophageal stenting
- Laser recanalisation
- Mucosal resection
- Staging laparoscopy & laparoscopic ultrasound scanning
- Operations for morbid obesity
- Endoscopic control of upper GI bleeding
- Variceal banding/sclerotherapy
- Biliary bypass
- Gastrectomy
- Proctoscopy/rigid sigmoidoscopy
- Flexible sigmoidoscopy & colonoscopy, diagnostic and therapeutic
- Procedures for fistula in ano
- Rectal injuries

5. **Hepatopancreaticobiliary Surgery**
- ERCP and endoscopic sphincterotomy
- Biliary reconstruction
- Porto-systemic shunt

6. **Surgery of the skin & integument**
- Excision of skin lesions
- Excision of skin tumours
- Split and full thickness skin grafting
- Node biopsy
- Block dissection of axilla and groin
- Surgery for soft tissue tumours including sarcomas

7. **Endocrine surgery / neck surgery**
- Thyroid lobectomy
- Thyroglossal cystectomy
- Submandibular salivary gland excision

8. **Breast surgery**
- Treatment of breast abscess
- Fine needle aspiration cytology
- Needle localisation biopsy
- Trucut biopsy
- Mammary duct fistula
- Excision of breast lump
- Mastectomy
- Reconstruction
- Myocutaneous flaps
- Tissue expanders
- Complications and re-operation
- Breast reduction
9. Hernias
- Surgery for all abdominal herniae, using open and laparoscopic techniques
- Repair of children’s herniae

10. Genitourinary Surgery
- Dialysis and renal transplant
- Suprapubic catheter insertion
- Urethral catheterisation
- Suprapubic cystostomy
- Pyeloplasty
- Complex hypospadias repair
- Nephrectomy
- Reimplantation of ureters

11. Vascular surgery
- Vascular suture/anastomosis
- Approach to/control of infra-renal aortic, iliac and femoral arteries
- Control of venous bleeding
- Balloon thrombo-embolectomy
- Amputations of the lower limb
- Fasciotomy
- Primary operation for varicose veins
- Abdominal aortic aneurysm repair, elective and ruptured
- Femoro-popliteal bypass
- Femoro-femoral bypass

12. Thoracic Surgery
- Repair pectus excavatum
- Thoracotomy
- Foreign body retrieval
- Competence in performing appropriate Mediastinal exploration
- Thoracic incisions

13. Others
- Skin and skeletal traction
- Open fracture debridement
- External fixation and Nerve repair
- Flexor and extensor tendon repair
- Surgical approaches to the joints and arthrotomy
- Spinal injury
- Emergency management of closed and open head injury
- Insertion and management of chest drains
- Thoracotomy and post operative management
Part III- MS Plastic Surgery
Clinical Component

I. Basic Science
1. Embryology and development of human tissues
2. Genetics and congenital abnormalities
3. Mechanism of healing of tissues, factors affecting the healing
4. Infection and its management
5. General principles of Surgery
6. The suture materials and suture techniques
7. Clinical examination of various systems and clinical photography
8. General anesthesia pre and post operative care for general anesthesia
9. Local, regional and other nerve blocks
10. Hypotensive and hypothermic anesthesia
11. Management of benign and malignant lesions
12. Wound healing, wound care, dressings and splints
13. Fluid and electrolyte balance, acid base balance
14. Shock and pulmonary failure, blood transfusions, ventilatory support and critical care
15. Assessment of trauma, vascular emergencies embolism

II. General Topics
1. History of Plastic Surgery
2. Scope of Plastic Surgery
3. Tissue distortion, tissue loss and its management
4. Tissue culture, Transplantation biology and its applications
5. Plastic Surgery instruments and equipments
6. Maintenance of medical records, informed consent
7. Applications of computer and related programs
8. Social psychological, ethical and medico legal aspects communication skills
9. Implants, orthotics and prosthesis and applied to Plastic Surgery
10. Tissue expansion and tissue distraction
11. Management of Leprosy, leprosy deformities and leprosy reconstructive surgery
12. Endoscopic Plastic Surgery
13. Advances, recent advances and current trends in Plastic Surgery
14. Principles of surgical audit, understanding journal and review articles, text books and reference books, critical assessment of articles
15. Research methodology and biostatistics
16. Arteriovenous malformations, varicose veins, chronic venous insufficiency
17. Meningomyelocoele, encephalocoele, spinal fusion defects, ventral defects, anorectal anomalies

III. Principal aspects of Plastic Surgery

Skin
1. Anatomy and functions of skin
2. Diseases and other conditions affecting skin
3. Skin grafts, its take and behavior
4. Scars, unstable scars and scar contracture
5. Hypertrophic scars and Keloids
6. Flaps, anatomy and physiology, classification and applications
7. Pedicled skin flaps and tube pedicle

Head and Neck
1. Embryology, anatomy, growth and development of face and facial skeleton
2. Structure and development of teeth
3. Temporomandibular joint and its dysfunction
4. Fractures of facial skeleton, management, sequel and subsequent surgery
5. Reconstruction of ear, eyelid, lip, nose, cheek and soft tissues of face
6. Congenital deformities of face and syndromes
7. Cleft lip and palate, embryogenesis, management, orthodontics, velopharyngeal incompetence and speech therapy
8. Craniofacial abnormalities, clefts, syndromes, microsomia, synostosis and hypertelorism Ptsosis of eyelids
9. Facial Paralysis
10. Orthognathic surgery
11. Surgery of neck associated with congenital and acquired deformities
12. Rhinoplasty – corrective, aesthetic and reconstructive
13. Benign and malignant lesions and tumors of head and neck, tumor biology, management including chemotherapy, adjuvant therapy and radiotherapy
14. Reconstruction of mandible, maxilla and other bony defects
15. Prosthetic rehabilitation
16. Reconstruction of upper aerodigestive system

**Thorax**
1. Congenital and acquired defects of thorax and abdomen and its reconstruction
2. Decubitus ulcers and its management
3. Breast, anatomy, physiology, growth, development hormone influence, abnormalities, diseases, surgery and reconstruction, Gynecomastia
4. Reconstruction of full thickness defects of thorax and abdomen

**Lower extremity**
1. Anatomy and biomechanics of locomotor system
2. Functional anatomy of foot
3. Congenital and acquired deformities of lower extremity
4. Management of tissue defects following trauma
5. Lymphoedema

**Genitourinary**
1. Embryology and anatomy of the male and female genitourinary system and genitalia, undescended testis
2. Hypospadias, epispadias and ectopia vesicae, urinary diversion
3. Reconstruction of external genitalia
4. Vaginoplasty
5. Intersex
6. Infertility, vasectomy, tuboplasty, reconstruction

**Hand**
1. Embryology and anatomy of hand and upper extremity
2. Clinical examination of hand and general principles of hand surgery
3. Acute hand injuries
4. Tendon injuries
5. Nerve injuries
6. Brachial plexus injuries
7. Fractures and dislocations of hand
8. Injuries and disorders of nail
9. Electro diagnostic tests
10. Ischemic conditions and vasospastic disorders
11. Nerve compression syndromes
12. Surgery of spastic and tetraplegic hand
13. Infections and diseases of hand and its management
14. Congenital abnormalities of hand and its management
15. Tendon transfers
16. Lymphoedema
17. Benign and malignant tumors of hand
18. Rehabilitation of hand, physiotherapy, occupation therapy, splintage and prosthesis
19. Rheumatoid arthritis
20. Vascular malformations, tumors
21. Reconstruction of thumb
22. Reconstruction of mutilated hand
23. Innervated flaps

**Micro-surgery**
1. Principles of micro-surgery, micro vascular surgery and its applications
2. Replantations and revascularization surgery
3. Microvascular tissue transfer

**Burns**
1. Thermal, Electrical, Chemical, Radiation, Burns
2. Burns shock, Pathophysiology, treatment, wound care, nutrition, sequel
3. Post burn contractures, deformities and its management
4. Tangential excision, skin cover, allograft, homograft, xenograft and its application in burns
5. Planning for burns care in disaster
6. Organization of Burns care unit
7. Rehabilitation following burns, psychological and social impact
**Aesthetic Surgery**
1. Chemical peeling, dermabrasion, laser treatment
2. Blepharoplasty
3. Surgery of ageing face
4. Body contouring, liposuction, abdominoplasty, hernioplasty
5. Reduction and augmentation mammoplasty
6. Hair transplant
7. Orthognathic aesthetic surgery

**Paediatric Plastic Surgery**
1. General principles of cleft lip and palate management
2. General principles of craniofacial surgery
3. General principles of hypospadias management
4. General principles of congenital hand surgery
5. Prominent ears

**Part-III Thesis Component**  
*(Fifth year of MS Plastic Surgery Programme)*

**RESEARCH/ THESIS WRITING**
Total of one year will be allocated for work on a research project with thesis writing. Project must be completed and thesis be submitted before the end of training. Research can be done as one block in 5th year of training or it can be stretched over five years of training in the form of regular periodic rotations during the course as long as total research time is equivalent to one calendar year.

**Research Experience**
The active research component program must ensure meaningful, supervised research experience with appropriate protected time for each resident while maintaining the essential clinical experience. Recent productivity by the program faculty and by the residents will be required, including publications in peer-reviewed journals. Residents must learn the design and interpretation of research studies, responsible use of informed consent, and research methodology and interpretation of data. The program must provide instruction in the critical assessment of new therapies and of the surgical literature. Residents should be advised and supervised by qualified staff members in the conduct of research.

**Clinical Research**
Each resident will participate in at least one clinical research study to become familiar with:
1. Research design
2. Research involving human subjects including informed consent and operations of the Institutional Review Board and ethics of human experimentation
3. Data collection and data analysis
4. Research ethics and honesty
5. Peer review process

This usually is done during the consultation and outpatient clinic rotations.

**Case Studies or Literature Reviews**
Each resident will write, and submit for publication in a peer-reviewed journal, a case study or literature review on a topic of his/her choice.

**Laboratory Research**

*Bench Research*
Participation in laboratory research is at the option of the resident and may be arranged through any faculty member of the Division. When appropriate, the research may be done at other institutions.

*Research involving animals*
Each resident participating in research involving animals is required to:
1. Become familiar with the pertinent Rules and Regulations of the University of Health Sciences Lahore i.e. those relating to "Health and Medical Surveillance Program for Laboratory Animal Care Personnel" and "Care and Use of Vertebrate Animals as Subjects in Research and Teaching"
2. Read the "Guide for the Care and Use of Laboratory Animals"
3. View the videotape of the symposium on Humane Animal Care
METHODS OF INSTRUCTION/COURSE CONDUCTION

As a policy, active participation of students at all levels will be encouraged. Following teaching modalities will be employed:

1. Lectures
2. Seminar Presentation and Journal Club Presentations
3. Group Discussions
4. Grand Rounds
5. Clinico-pathological Conferences
6. SEQ as assignments on the content areas
7. Skill teaching in ICU, Operation theatres, emergency and ward settings
8. Attend genetic clinics and rounds for at least one month.
9. Self study, assignments and use of internet
10. Bedside teaching rounds in ward
11. OPD & Follow up clinics
12. Long and short case presentations

In addition to the conventional teaching methodologies interactive strategies like conferences will also be introduced to improve both communication and clinical skills in the upcoming consultants. Conferences must be conducted regularly as scheduled and attended by all available faculty and residents. Residents must actively request autopsies and participate in formal review of gross and microscopic pathological material from patients who have been under their care. It is essential that residents participate in planning and in conducting conferences.

1. Clinical Case Conference
Each resident will be responsible for at least one clinical case conference each month. The cases discussed may be those seen on either the consultation or clinic service or during rotations in specialty areas. The resident, with the advice of the Attending Surgeon on the Consultation Service, will prepare and present the case(s) and review the relevant literature.

2. Monthly Student Meetings
Each affiliated medical college approved to conduct training for MS Plastic Surgery will provide a room for student meetings/discussions such as:

a. Journal Club Meeting
b. Core Curriculum Meetings
c. Skill Development
**a. Journal Club Meeting**

A resident will be assigned to present, in depth, a research article or topic of his/her choice of actual or potential broad interest and/or application. Two hours per month should be allocated to discussion of any current articles or topics introduced by any participant. Faculty or outside researchers will be invited to present outlines or results of current research activities. The article should be critically evaluated and its applicable results should be highlighted, which can be incorporated in clinical practice. Record of all such articles should be maintained in the relevant department.

**b. Core Curriculum Meetings**

All the core topics of Plastic Surgery should be thoroughly discussed during these sessions. The duration of each session should be at least two hours once a month. It should be chaired by the chief resident (elected by the residents of the relevant discipline). Each resident should be given an opportunity to brainstorm all topics included in the course and to generate new ideas regarding the improvement of the course structure.

**c. Skill Development**

Two hours twice a month should be assigned for learning and practicing clinical skills.

**List of skills to be learnt during these sessions is as follows:**

1. Residents must develop a comprehensive understanding of the indications, contraindications, limitations, complications, techniques, and interpretation of results of those technical procedures integral to the discipline.
2. Residents must acquire knowledge of and skill in educating patients about the technique, rationale and ramifications of procedures and in obtaining procedure-specific informed consent. Faculty supervision of residents in their performance is required, and each resident's experience in such procedures must be documented by the program director.
3. Residents must have instruction in the evaluation of medical literature, clinical epidemiology, clinical study design, relative and absolute risks of disease, medical statistics and medical decision-making.
4. Training must include cultural, social, family, behavioral and economic issues, such as confidentiality of information, indications for life support systems, and allocation of limited resources.
5. Residents must be taught the social and economic impact of their decisions on patients, the primary care physician and society. This can be achieved by attending the bioethics lectures.
6. Residents should have instruction and experience with patient counseling skills and community education.
7. This training should emphasize effective communication techniques for diverse populations, as well as organizational resources useful for patient and community education.
8. Residents should have experience in the performance of Plastic Surgery related clinical laboratory and radionuclide studies and basic laboratory techniques, including quality control, quality assurance and proficiency standards.
9. Each resident will manage at least the following essential Plastic surgical cases and observe and participate in each of the following procedures, preferably done on patients under supervision initially and then independently (pg.11)

3. Annual Grand Meeting

Once a year all residents enrolled for MS Plastic Surgery should be invited to the annual meeting at UHS Lahore. One full day will be allocated to this event. All the chief residents from affiliated institutes will present their annual reports. Issues and concerns related to their relevant courses will be discussed. Feedback should be collected and suggestions should be sought in order to involve residents in decision making. The research work done by residents and their literary work may be displayed. In the evening an informal gathering and dinner can be arranged. This will help in creating a sense of belonging and ownership among students and the faculty.
LOG BOOK

The residents must maintain a log book and get it signed regularly by the supervisor. A complete and duly certified log book should be part of the requirement to sit for MS examination. Log book should include adequate number of diagnostic and therapeutic procedures observed and performed, the indications for the procedure, any complications and the interpretation of the results, routine and emergency management of patients, case presentations in CPCs, journal club meetings and literature review.

**Proposed Format of Log Book is as follows:**

Candidate’s Name: _________________________________
Roll No. _____________

The above mentioned procedures (pg.11) shall be entered in the log book as per format

**Procedures Performed**

<table>

EVALUATION & ASSESSMENT STRATEGIES

Assessment

It will consist of action and professional growth oriented **student-centered integrated assessment** with an additional component of **informal internal assessment, formative assessment** and **measurement-based summative assessment**.

Student-Centered Integrated Assessment

It views students as decision-makers in need of information about their own performance. Integrated Assessment is meant to give students responsibility for deciding what to evaluate, as well as how to evaluate it, encourages students to ‘own’ the evaluation and to use it as a basis for self-improvement. Therefore, it tends to be growth-oriented, student-controlled, collaborative, dynamic, contextualized, informal, flexible and action-oriented.

In the proposed curriculum, it will be based on:

- Self Assessment by the student
- Peer Assessment
- Informal Internal Assessment by the Faculty

**Self Assessment by the Student**

Each student will be provided with a pre-designed self-assessment form to evaluate his/her level of comfort and competency in dealing with different relevant clinical situations. It will be the responsibility of the student to correctly identify his/her areas of weakness and to take appropriate measures to address those weaknesses.

**Peer Assessment**

The students will also be expected to evaluate their peers after the monthly small group meeting. These should be followed by a constructive feedback according to the prescribed guidelines and should be non-judgmental in nature. This will enable students to become good mentors in future.

**Informal Internal Assessment by the Faculty**

There will be no formal allocation of marks for the component of Internal Assessment so that students are willing to confront their weaknesses rather than hiding them from their instructors.

It will include:

a. Punctuality
b. Ward work  
c. Monthly assessment (written tests to indicate particular areas of weaknesses)  
d. Participation in interactive sessions

**Formative Assessment**

Will help to improve the existing instructional methods and the curriculum in use

*Feedback to the faculty by the students:*

After every three months students will be providing a written feedback regarding their course components and teaching methods. This will help to identify strengths and weaknesses of the relevant course, faculty members and to ascertain areas for further improvement.

**Summative Assessment**

It will be carried out at the end of the programme to empirically evaluate cognitive, psychomotor and affective domains in order to award diplomas for successful completion of courses.
MS Plastic Surgery Examinations

Part I MS Plastic Surgery
Total Marks: 200

All candidates admitted in MS Plastic Surgery course shall appear in Part I examination at the end of first calendar year.

Components of Part-I Examination:
Paper-I, 100 MCQs (single best, having one mark each)  100 Marks
Paper-II, 10 SEQs (having 10 marks each)  100 Marks

Topics included in papers:

<table>
<thead>
<tr>
<th>Paper-I</th>
<th>Paper-II</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Anatomy (20 MCQs)</td>
<td>(2 SEQs)</td>
</tr>
<tr>
<td>2. Physiology (20 MCQs)</td>
<td>(2 SEQs)</td>
</tr>
<tr>
<td>3. Pathology (20 MCQs)</td>
<td>(2 SEQs)</td>
</tr>
<tr>
<td>4. Biochemistry (10 MCQs)</td>
<td>(1 SEQ)</td>
</tr>
<tr>
<td>5. Pharmacology (15 MCQs)</td>
<td>(1 SEQ)</td>
</tr>
<tr>
<td>6. Behavioural Sciences (10 MCQs)</td>
<td>(1 SEQ)</td>
</tr>
<tr>
<td>7. Biostatistics &amp; Research Methodology (05 MCQs)</td>
<td>(1 SEQ)</td>
</tr>
</tbody>
</table>

Part II- MS Plastic Surgery
Total Marks: 430

All candidates admitted in MS Plastic Surgery course shall appear in Part-II examination at the end of second calendar year.

There shall be two written papers of 100 marks each, Oral & practical/ clinical examination of 150 marks and log book assessment of 80 marks.

Topics included in papers 1 & 2:
Basic Principles of Surgery

Components of Part II Examination

Theory:

<table>
<thead>
<tr>
<th>Paper 1</th>
<th>Paper 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>10 SEQs (No Choice; 05 marks each) 100 Marks 3 Hours</td>
<td>10 SEQs (No Choice; 05 marks each) 100 Marks 3 Hours</td>
</tr>
<tr>
<td>50 MCQs 50 Marks</td>
<td>50 MCQs 50 Marks</td>
</tr>
</tbody>
</table>
50 MCQs

Only those candidates, who pass in theory papers, will be eligible to appear in the Oral & Practical/Clinical Examination.

Oral & Practical/ Clinical Examination shall be held in clinical techniques relevant to General Surgery.

**OSCE** 50 Marks

10 stations each carrying 05 marks of 10 minutes duration; each evaluating performance based assessment with five of them interactive

**Clinical** 100 Marks

Four short cases (each 15 marks) 60 Marks
One long case: 40 Marks

**Log Book** 80 Marks

**Part III MS Plastic Surgery**

Total Marks: 960

All candidates admitted in MS Plastic Surgery course shall appear in Part-III examination at the end of structured training programme (end of 5th calendar year and after clearing Part I & II examinations).

There shall be two written papers of 150 marks each, practical/ clinical examination of 300 marks, log book assessment of 120 marks and thesis examination of 200 marks.

**Part III MS Plastic Surgery**

Clinical Examination

Total Marks: 720

**Topics included in paper 1**

1. Micro-surgery (10 MCQs)
2. Basic Science and General Plastic Surgery (20 MCQs)
3. Head and Neck and Thorax (20 MCQs)
4. Upper and Lower Extremities (including Hands) (25 MCQs)

**Topics included in paper 2**

1. Genitourinary Surgery (10 MCQs)
2. Paediatric Plastic Surgery (15 MCQs)
3. Skin (25 MCQs)
4. Burns and Aesthetic Surgery (25 MCQs)

**Components of Part III Clinical Examination**

**Theory**

**Paper I**
